

*This is one bug
you'll want in your pool.*

Had enough with manual pool cleaning maintenance? Want to start enjoying your pool more? Then throw a bug in your pool. That's right. An AquaBug®. The newest automatic pool cleaner for above-ground pools — from Hayward.

Using our patented SmartDrive™ programmed steering system, AquaBug won't miss a spot — gobbling up everything, from microscopic dust to larger debris. And it does so automatically. Giving you and your family more time to enjoy your pool.

ABOVE-GROUND AUTOMATIC POOL CLEANER

AQB98

AquaBug®

Automatic Pool Cleaner for Above-Ground Pools

You'll never be bugged by
manual pool cleaning again.

*AquaBug easily
gobbles up dirt
and debris.*

The AquaBug provides you with easy, trouble-free operation. You never need to empty or replace debris bags. And because AquaBug works with your existing filtration system — no extra energy-consuming booster pump is required. Everything for simple 10 minute or less installation is included — even the hoses.

*This bug loves
to circulate.*

Plus, AquaBug improves water circulation by acting as a moving main drain, pulling water from the bottom of your pool as it moves. Your water circulates and your pool stays cleaner — without the overuse of chemical sanitizers.

*Exclusive SmartDrive™
programmed steering
system means AquaBug
won't miss a spot!*

*AquaBug automatic pool cleaner
from Hayward.*

*This bug hangs out
with a smart crowd.*

As part of a complete family of superior quality products designed to keep your pool at its sparkling best, AquaBug is the smart alternative to the drudgery of manual cleaning. And it's from Hayward, the company that engineered automatic pool cleaning technology.

*It's got a face
you'll grow to love.*

The AquaBug automatic pool cleaner from Hayward. After you see how easily and effortlessly it keeps your pool clean, it will be love at first sight.

*Installs in less
than 10 minutes.*

*Let AquaBug take a
swat at pool cleaning
maintenance.*
